Akrilik Cilalı Mobilya Panellerimiz; üretim sürecinin hızlı olması, çizilmesinin neredeyse imkansız olması, darbelere karşı dayanıklı olması, Uv(güneş) ışınlarına karşı mukavemet göstermesi(iç mekanda), şık ve oldukça parlak bir görüntü sunması sebebiyle dünyada ve ülkemizde hızla yaygınlaşmaktadır.

(Our acrylic furniture panels become widespread in Turkey and worldwide because of rapid production, unscratchable surface, enduring to impacts & Uv (indoor), and most importantly elegant and glossy view.)

Fabrikamızdaki 96 metrelik cila hattında, belli ölçülerdeki paneller zımparalanır, tutucu katmanın üstüne Uv dijital baskı yapılır... Bunun gibi 11 işlemin ardından akrilik cila işlemi uygulanır. Bu süreçlerin hepsi otomatize edilmiştir ve dolayısıyla insani hatalar sıfıra indirgenmiştir.

(At first we sand panels in our 96 meters long acrylic product line. Then we apply primer layer and panel goes into Uv Digital Print to handle designs... After 11 steps, we polish panels and serve to our customers. These all processes are automatized as we do not permit human mistakes.)
